

AQA Maths Revision Resources

- Use the checklist to identify what you need to work on.
- Complete all the past papers you can find, make sure you mark them when you have completed them. I would do it in timed conditions and then go back over any questions you didn't have time for in a different pen so you can see how you did under pressure compared to with no time limit.
- Once you have done a paper make sure you then do some focused revision on any areas you struggled with on the paper.

Revision resources:

1. <https://integralmaths.org/> Notes, mixed questions, topic tests and online tests on all areas. Best for specific revision. Make sure you always check your answers and email me for the topic test solutions.
2. <https://sites.google.com/view/tlmaths/home> Videos on all topics, goes through clear examples on everything on the A level spec. Watch these if you are struggling with a topic before trying any more questions.
3. <https://www.mathsgenie.co.uk/AQA-a-level-papers.html> - All the past papers and mark schemes. Focus on the Pure sections of A level Papers and then AS topics for Mechanics and Statistics.
4. <https://crashmaths.com/a-level-practice-papers-aqa/> More practice papers
5. <https://www.physicsandmathstutor.com/> Exam questions on all topics. Make sure you are on the AQA resources.
6. <https://parkermaths.com/Students/Y2/ExamTechnique.php> Lots of mixed resources, lessons and exam technique advice
